Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Perrins et al.

The tote conveyor system disclosed by Perrins et al. includes all the claimed features and in particular includes: **(claim 1)** a mounting platform 40; a plurality of vertical support members attached perpendicularly to the mounting platform (figure 5); lateral support members 170,175 attached to and on top of the vertical support members as broadly claimed; a horizontal positioning conveyor between the lateral supports capable of permitting a packing container to clear a lower extremity of a discharge chute as broadly claimed; and **(claim 2)** the positioning conveyor including a plurality of evenly spaced rollers positioned along the length of the lateral support member 170 (figure 5A).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Perrins et al. in view of Bonham et al.

With regard to claims 2, Perrins et al. includes all the claimed features but does not disclose the positioning conveyor is a conveyor belt. However, Bonham et al. includes the broad teaching of providing a tote conveying system include a positioning conveyor that is a conveyor belt (column 9, lines 18-22). It would have been obvious to one of ordinary skill in the art to provide the positioning conveyor be an externally powered conveyor belt such requiring the mere choice of an art recognized conveyor type capable of transporting totes in a tote conveying system as taught by Bonham et al.

Allowable Subject Matter

5. Claims 4-9 are allowed.

6. The following is an examiner's statement of reasons for allowance: a tote conveyor system and method thereof including the unique features of 'a self-propelled spray wash conveyor with a mounting platform, vertical support members, lateral support members, and a positioning conveyor belt all positioned sufficient to permit a

packing container to clear the lower extremity of a vegetable discharge chute attached to the spray wash conveyor' in combination with the rest of the claim language is not taught or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following are cited to show the art with respect to conveyor systems having gravity and power-driven sections: Rosencrans and Beer et al.
